# SHUBERT "SERVICE"

WHAT IT MEANS TO YOU!

**W**E are pleased to present to you our latest SUPPLY CATALOG and THE ART OF TRAPPING combined. Look it over carefully—use the numerous "money saving" largesse "SHUBERT" offers you in traps, animal baits, rifles, ammunition, etc. In presenting this catalog to you, we want to mention, that great care has been taken in the selection of the articles listed. Only those articles with an established reputation have been chosen, assuring you that every article you purchase from "SHUBERT," is the very best, both in quality and workmanship, that it is possible to procure. Our prices are as low, or lower, than it is possible to buy the same quality merchandise anywhere. Our Trappers' Supply Department is conducted, not with a view of making a profit, but solely with the intention of supplying our shippers' requirements, at the lowest possible price. This, we feel is our duty, and conforms with our policy of rendering REAL "SERVICE" to fur shippers.

Of utmost importance to YOU, is the selection of the fur house with whom you deal. You must deal with the RIGHT FUR HOUSE—one with an established reputation for **honesty, reliability and responsibility.** "SHUBERT" is the RIGHT FUR HOUSE for YOU. "SHUBERT" has been satisfying Raw Fur Shippers all over North America for the past forty years. We are today recognized as the leading fur house of North America—our progress and success is nothing more than the result of gaining the confidence of fur shippers. A confidence inspired by our "superior service," our "fair and square methods," our "unswerving honesty" and our ever-watchful care of fur shippers' interests. Our every effort is directed towards maintaining that enviable position which it has taken so many years to attain. Ship all your furs direct to A. B. SHUBERT Limited—you'll get LIBERAL GRADING—PROMPT RETURNS—HIGHEST MARKET PRICES—EFFICIENT and COURTEOUS "SERVICE." If you have never shipped to "SHUBERT"—you owe it to yourself to give us at least a trial. To our old shippers, we want to say: that "SHUBERT" is NOW, in a better position than ever before, to give you SUPERIOR "SERVICE" and COMPLETE SATISFACTION, so COME ON WITH YOUR FURS.

## "SHUBERT" GUARANTEES

every article in this catalog to be exactly as described. If for any reason you are not fully satisfied—if you want an article exchanged or your money refunded, just return the article (before using), charges prepaid, and your full purchase price will be refunded or a satisfactory exchange made. This is an ABSOLUTE GUARANTEE to YOU—you MUST be fully satisfied, or we agree to make satisfactory exchange or refund your money.

Send in your order early for your season's requirements. YOU will "save money" by purchasing NOW, at these "rock-bottom" prices. YOUR order will receive PROMPT, EFFICIENT and COURTEOUS ATTENTION, and YOU are guaranteed, ABSOLUTE SATISFACTION.

## Instructions for Ordering Supplies

Read carefully the description of the article required. Every article in this catalog is accurately described and most articles illustrated. In ordering WRITE PLAINLY name of article, catalog number, quantity required and price. Be sure to mention sizes and kinds of traps, caliber of gun, rifle or revolver, etc. Mark your order clearly and distinctly so that there can be no delay in filling same. Your name and address (in full) must be clearly and distinctly written. In order to facilitate deliveries we suggest that you print your name and address on the order

blank, thereby avoiding any possibility of mistake in name or address. If your express office or shipping point is not the same as your post office, be sure that you mark plainly in the space provided for this purpose the name of the point to which the articles are to be shipped in case they are going forward by Express. Our order blank is very plain and if you order correctly, you not only insure prompt delivery to yourself of articles ordered, but will enable "SHUBERT" to avoid mistakes in filling your order.

## How to Send Remittances

Always enclose sufficient money to cover fully the cost of the articles you want. Failure to do so will only mean a delay. Prices of each article are plainly shown in catalog, also the mailing weight. Remit by Express Order, P. O. Money Order or Postal Note. If you send cash be sure that letter is REGISTERED. Orders for goods to be shipped by mail must be accompanied with sufficient money or postage stamps to cover cost of transportation. We give below a table showing the correct Parcel Post Rates from Winnipeg to various points throughout the Dominion. Please do not overlook including in your remittance a

sufficient amount to cover postage charges. All goods will be shipped by Parcel Post or Express. In cases where shipment is requested sent by Express, we will send same Collect, but if there should be no Agent at your Express Office it will be necessary for you to include sufficient remittance to cover Express charges, for in cases where there is no Agent or Express Office the Express Companies demand that parcels addressed to such points have all charges prepaid at this end.

**AMMUNITION CANNOT BE SENT BY MAIL.** All shipments of ammunition must go forward by Express.

## We Accept Raw Furs in Exchange for Supplies

"SHUBERT" will gladly accept raw fur shipments, the value of which may be applied towards the purchase price of any article you may require. When sending a shipment of raw furs with an order for supplies, be sure that you specify in the order blank that shipment is going forward to cover value of order for supplies. Always mail the order blank direct to A. B. SHUBERT LIMITED, Winnipeg, Man., even though you send the shipment of furs to one of our branch offices. This will help to avoid delay, as it is not unusual for tags on parcels to be destroyed or lost, so that by mailing

your order blank direct to the Winnipeg office, it will insure certain delivery of your letter to us and prompt attention to your order for supplies. Be sure, however, that the furs you send will cover fully the cost of any supplies you may order, and the transportation on same. Don't hesitate, however, to send shipments the value of which may exceed the cost of supplies you order, for in all cases we will promptly send you remittance for the difference.

All prices are subject to change without notice.

The minimum charge on any parcel shall not exceed 1 cent on a corner.

### HAVE YOUR MAIL PARCELS INSURED

Don't, for the sake of a few cents, take the risk of having your parcels lost. For your convenience and protection we have made arrangements whereby you can have your mail parcels insured against loss by fire, theft, or from any cause whatever, while the parcel is in transit. The cost of this protection to YOU, is but a trifle and we recommend that you have all your mail parcels insured. The fees for the above-mentioned insurance are as follows:

Insurance for parcels valued up to \$25.00 . . . . .	\$0.06
Insurance for parcels valued from \$25.00 to \$50.00 . . . . .	.10

To be used only when ordering Guns, Rifles, Air Rifles, Revolvers or Ammunition.

I hereby certify that I am over the age of 16 years.

# VICTOR TRAPS

## The Old Reliable

The Victor Trap is the most reliable and moderately priced trap on the market. Each year the demand for Victor Traps becomes greater, which in itself is proof that these traps are giving perfect satisfaction. Every trap is thoroughly inspected and guaranteed to be in perfect working order.

Look for the V on the pan of every trap.

### No. 0—WEASEL TRAP

This is a very small trap. Made specially for Weasels. Can also be used for Gophers. Spread of jaws  $3\frac{1}{2}$  ins. Mailing weight each 10 oz.; per dozen 6 lbs.

Price each with chain ..... \$ .25  
Price dozen with chains ..... 2.80

### No. 1—MUSKRAT TRAP

This is the popular trap for Muskrat, but can also be used for Skunk, Mink or other animals of that size. Spread of jaws 4 ins. Mailing weight each 1 lb.; per dozen 10 lbs.

Price each with chain ..... \$ .30  
Price dozen with chains ..... 3.40

### No. 1 $\frac{1}{2}$ —FOR MINK AND SKUNK

This trap is slightly larger and heavier than No. 1, and is an ideal trap for Mink and Skunk. Also makes a good trap for Raccoon. Spread of jaws  $4\frac{1}{2}$  ins. Mailing weight each 20 oz.; per dozen 15 lbs.

Price each with chain ..... \$ .45  
Price dozen with chains ..... 5.15

### No. 91—DOUBLE JAWS

This trap is the same as No. 1, with the exception that it has double jaws that grip high on the leg and hold fast, making doubly sure of your catch. Mailing weight each 1 lb.; per dozen 10 lbs.

Price each with chain ..... \$ .45  
Price dozen with chains ..... 5.15

### No. 91 $\frac{1}{2}$ —DOUBLE JAWS

This trap is the same as No. 1 $\frac{1}{2}$ , with the exception of the powerful double jaws. Mailing weight each 20 oz.; per dozen 15 lbs.

Price each with chain ..... \$ .70  
Price dozen with chains ..... 7.25

## VICTOR DOUBLE-SPRING TRAPS

These are the famous Victor Double Spring Traps which are used for the larger fur bearers, having a heavy steel spring on each side of the trap giving them a double holding power, thus making sure that your catch cannot get away. Each trap thoroughly tested and fully guaranteed.

### No. 2—FOR FOX, RACCOON, ETC.

Quite capable of holding fast any Fox, Raccoon, Fisher or Badger. Thoroughly tested and guaranteed to give absolute satisfaction. Spread of jaws  $4\frac{1}{2}$  ins. Mailing weight each 21 oz.; per dozen 15 lbs.

Price each with chain ..... \$ .60  
Price dozen with chains ..... 6.75

### No. 3—FOR BEAVER AND OTTER

We readily recommend this double spring trap for catching and holding Otter, Beaver and Fox. Spread

of jaws  $5\frac{1}{2}$  ins. Mailing weight each 2 lbs.; per dozen 25 lbs.

Price each with chain ..... \$ .95  
Price dozen with chains ..... 11.00

### No. 4—FOR COYOTE, LYNX AND OTTER

This is the strongest and heaviest Victor Trap made. It is especially adapted for catching Coyotes, Lynx, Otter, Beaver, etc. Spread of jaws  $5\frac{1}{2}$  ins. Mailing weight each 36 oz.; per dozen 26 lbs.

Price each with chain ..... \$ 1.15  
Price dozen with chains ..... 13.25

## THE VICTOR GIANT No. 1

The Victor Giant No. 1, which is the latest addition to the Victor line of traps, is the most practical trap made. The jaws are especially constructed so that they grip the animal high up on the leg, almost next to the body, thus making it absolutely impossible for the animal to gnaw or twist its leg out of the trap. The extra large pan makes sure that the animal cannot step between the pan and the jaws. This trap cannot be best when used for Muskrat, Mink, Skunk, Marten, etc. Spread of jaws  $4\frac{3}{4}$  ins. Mailing weight each 1 lb.; per dozen 10 lbs.

Price each with chain.....\$ .40

Price dozen with chains.....4.35

## VICTOR TRAPPERS' OUTFIT

This outfit consists of an assortment of six thoroughly tested Victor Traps. All neatly packed in cardboard carton.

Traps consist of one No. 0 Victor, three No. 1 Victor, one No. 91 Victor and one No. 1 Giant. All specially tested.

This is an outfit that every boy or amateur trapper should have. It gives you an assortment of traps suitable for trapping such animals as Muskrat, Weasel, Skunk, Mink, Marten, etc., without making it necessary to buy separately a number of each kind of traps.

Mailing weight each 7 lbs.

Price each, complete.....\$2.90

## ONEIDA JUMP TRAPS

Jump traps are lighter and easier to handle than other traps. Their compactness makes it easy for trappers who have a long trap line or many traps to carry, as they are comparatively light and take up but little room. Owing to the fact that there are no springs jutting out, it makes it possible to set even the largest jump trap in a hole or runway, which need not be any bigger than the spread of the jaws. Moreover, when these traps are sprung, they jump up, catching the animal high up and preventing it from gnawing its leg out of the trap. Some of the larger sizes are furnished with teeth to make absolutely sure of your catch. Every trap is thoroughly tested and guaranteed.

## No. 1—MUSKRAT JUMP TRAP

The correct trap to use for Muskrat, also Mink. Spread of jaws  $4\frac{3}{4}$  ins. Mailing weight each 1 lb.; per dozen 10 lbs.

Price each with chain.....\$ .35

Price dozen with chains.....4.25

## No. 2—JUMP TRAP

This trap used for Skunk, Mink, Marten, etc. Spread of jaws  $5\frac{1}{4}$  ins. Mailing weight each 1 lb.; per dozen 11 lbs.

Price each with chain.....\$ .40

Price dozen with chains.....4.80

## No. 3—JUMP TRAP

This trap for Fox, Fisher, Raccoon, also Skunk. Spread of jaws  $7\frac{1}{4}$  ins. Mailing weight each 2 lbs.; per dozen 25 lbs.

Price each with chain.....\$ .80

Price dozen with chains.....9.60

## No. 4—JUMP TRAP

This trap for Coyote, Fox, Fisher and Lynx. Spread of jaws  $6\frac{1}{2}$  ins. Mailing weight each 2 lbs.; per dozen 25 lbs.

Price each with chain.....\$ 1.10

Price dozen with chains.....13.20

## No. 5—JUMP TRAP, DOUBLE JAWS

To be used for Mink and Muskrat. Has double jaws to keep animal from pulling out. Spread of jaws  $4\frac{3}{4}$  ins. Mailing weight each 1 lb.; per dozen 10 lbs.

Price each with chain.....\$ .50

Price dozen with chains.....6.00

## No. 6—COYOTE JUMP TRAP

This trap for Coyote, Raccoon, Lynx, Otter and the other larger animals. Spread of jaws  $7\frac{1}{4}$  ins. Mailing weight each 3 lbs.; per dozen 30 lbs.

Price each with chain.....\$ 1.30

Price dozen with chains.....15.60

## No. 12—COYOTE JUMP TRAP WITH TEETH

This trap is the same as No. 6, except that teeth jaws are used. Spread of jaws  $6\frac{1}{2}$  ins. Mailing weight each 3 lbs.; per dozen 30 lbs.

Price each with chain.....\$ 1.15

Price dozen with chains.....13.80

## No. 14—JUMP TRAP WITH TEETH

This trap is the same as No. 4, except that teeth jaws are used. Spread of jaws  $7\frac{1}{4}$  ins. Mailing weight each 3 lbs.; per dozen 30 lbs.

Price each with chain.....\$ 1.40

Price dozen with chains.....16.80

# NEWHOUSE TRAPS

## No. 6—NEWHOUSE WEASEL TRAP

This trap is used for Weasel, also Gophers. Spread of jaws 3 1/4 ins. Mailing weight each 14 ozs.; per dozen 5 lbs.  
 Price each with chain..... \$ .06  
 Price dozen with chains..... 7.25

## No. 1—NEWHOUSE MUSKRAT TRAP

This is the popular Muskrat trap. Can also be used for Skunk and Mink. Spread of jaws 4 ins. Mailing weight each 1 lb.; per dozen 10 lbs.  
 Price each with chain..... \$ .75  
 Price dozen with chains..... 9.00

## No. 1 1/4—NEWHOUSE SKUNK TRAP

A Mink and Skunk Trap. Gets them and holds them. Spread of jaws 5 1/4 ins. Mailing weight each 24 ozs.; per dozen 13 lbs.  
 Price each with chain..... \$1.10  
 Price dozen with chains..... 13.20

## No. 2—NEWHOUSE FOX TRAP

A double spring trap. Makes doubly sure of holding Fox or Badger. Spread of jaws 4 1/4 ins. Mailing weight each 2 lbs.; per dozen 20 lbs.  
 Price each with chain..... \$ 1.85  
 Price dozen with chains..... 22.20

The famous Newhouse Traps are used by all experienced and expert trappers, as they are unquestionably the most perfect traps made. Only the very best of steel is used in the manufacture of these traps. The springs are larger and heavier than any other trap, and are made from special steel after the Oneida process. Professional trappers know that these traps always work perfectly and have a greater holding power than any other trap made. If you use Newhouse Traps, you will be using the best that money can buy, and given proper care and attention, they will last a lifetime. We recommend that you use Newhouse Traps. It pays to use the best.

## No. 3—NEWHOUSE LYNX TRAP

Another double spring trap. Used everywhere for Otter, Lynx, etc. Spread of jaws 3 3/4 ins. Mailing weight each 1 lb.; per dozen 10 lbs.  
 Price each with chain..... \$ 1.20  
 Price dozen with chains..... 14.25

## No. 4—NEWHOUSE COYOTE TRAP

Larger and heavier than No. 3. Will hold any Coyote or Badger without fail. Spread of jaws 6 1/4 ins. Mailing weight each 4 lbs. per dozen 40 lbs.  
 Price each with chain..... \$ 2.50  
 Price dozen with chains..... 29.50

## No. 4 1/2—NEWHOUSE TRAP

An extra heavy trap designed especially for catching Canadian Wolves and Coyotes. Has an extra heavy steel chain. We highly recommend this trap. Spread of jaws 4 3/4 ins. Mailing weight each 9 lbs.; per dozen 100 lbs.  
 Price each with chain..... \$8.50

## No. 52—NEWHOUSE BEAR TRAP

This trap is especially designed for trapping Bears. Has extra heavy double steel springs and steel jaws; also riveted and heavy chain. Spread of jaws 9 1/4 inches. Mailing weight each 14 lbs.  
 Price each with chain..... \$13.00

# HAWLEY AND NORTON TRAPS

The Hawley and Norton Traps are made different from any other trap. A glance at the illustration will show the difference in construction. For this reason some trappers prefer Hawley and Norton Traps to any others. They are perfectly made, have powerful steel springs, and are all carefully tested and guaranteed.

## No. 6—HAWLEY AND NORTON

A small single spring trap used for Weasel and Gopher. Spread of jaws 3 1/4 ins. Mailing weight each 12 ozs.; per dozen 5 lbs.  
 Price each with chain..... \$ .45  
 Price dozen with chains..... 5.15

## No. 1—HAWLEY AND NORTON

The regular single spring Muskrat trap. Spread of jaws 4 ins. Mailing weight each 1 lb.; per dozen 10 lbs.  
 Price each with chain..... \$ .55  
 Price dozen with chains..... 6.60

## No. 1 1/4—HAWLEY AND NORTON

The most size for Mink and Skunk. Spread of jaws 4 1/4 ins. Mailing weight each 24 ozs.; per dozen 13 lbs.  
 Price each with chain..... \$ .84  
 Price dozen with chains..... 10.08

## No. 2—HAWLEY AND NORTON

This is a double spring trap used for Fox and Skunk. Spread of jaws 4 1/4 ins. Mailing weight each 2 lbs.; per dozen 20 lbs.  
 Price each with chain..... \$ 1.15  
 Price dozen with chains..... 13.75

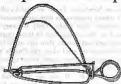

## No. 3—HAWLEY AND NORTON

Also a double spring trap. Will hold any Coyote, Otter or Lynx. Spread of jaws 3 3/4 ins. Mailing weight each 10 ozs.; per dozen 25 lbs.  
 Price each with chain..... \$ 1.50  
 Price dozen with chains..... 17.25

## No. 4—HAWLEY AND NORTON

A double spring extra heavy trap for Coyotes, Beavers, etc. Guaranteed to hold. Spread of jaws 6 ins. Mailing weight each 3 lbs.; per dozen 30 lbs.  
 Price each with chain..... \$ 1.75  
 Price dozen with chains..... 21.00

## Stop Thief Traps

These traps are made from special steel and can be placed almost anywhere, especially in holes and dens. When baited and properly set, they never fail to go, and always kill their catch immediately, without damaging the skin.

- No. 1—Is the smallest size for Weasel. Mailing weight each 12 ozs.; per dozen 6 lbs.  
 Price each with chain ..... \$ .30  
 Price dozen with chains ..... 3.50
- No. 2—This is the right size for Muskrat, Mink and Marten. Mailing weight each 1 lb.; per dozen 10 lbs.

 Price each with chain ..... \$ .50  
 Price dozen with chains ..... 5.50

## EXTENSION TRAP CHAINS

Every trapper should have a few of these in his kit, so that he can easily replace a broken chain, or extend the chain to any length the net may require.

- 1—20 ins. long. Price each ..... \$ .20  
 Per dozen ..... 2.00
- 4—27 ins. long. Price each ..... .35  
 Per dozen ..... 2.00

Mailing weight, No. 1, each 8 ozs.; dozen 3 lbs.  
 Mailing weight, No. 4, each 1 lb.; dozen 7 lbs.

NEWHOUSE  
FUR STRETCHERS

The Newhouse fur stretchers and you will always have a perfectly stretched pelt, which will naturally increase the market value. They are much better than the old board stretchers, being adjustable and can be made to fit any medium size pelt. When the pelt is dry they are easily removed. They are also very light, being made of galvanized iron, and consequently will not rust. These stretchers are fitted with sliding prongs, so that they can be used for animals ranging from a small flat to a large Skunk. Length is 20 inches. Every trapper should have a few dozen of these, for they soon pay for themselves.

- Price each ..... \$ .35  
 Price dozen ..... 2.90
- By mail, single stretchers, extra ..... .10  
 Mailing weight per dozen 5 lbs.

## Oneida Killum Traps

The Oneida Killum Trap is made of specially tempered steel, and can be set in the animals' entrances to dens and in runways. When set, the trap forms a complete circle, so that any animal attempting to touch the bait or pass through the trap, is securely caught and killed instantly.

- No. 1—For Muskrat, Mink and Marten. Diameter of circle 5 1/2 ins. Mailing weight each 2 lbs.; per dozen 15 lbs.  
 Price each with chain ..... \$ .30  
 Price dozen with chains ..... 3.50
- No. 2—For Skunk, Raccoon, Mink, etc. In fact any animal of this size. Diameter of circle 7 ins. Mailing weight each 2 lbs.; per dozen 20 lbs.  
 Price each with chain ..... \$ .40  
 Price dozen with chains ..... 4.80

## JUMP TRAP SETTING CLAMP

## SETS ALL SIZES OF JUMP TRAPS

Every owner of a Jump Trap needs one of these. Enables you to make a quick and safe set. Place the clamp on the bottom spring, set wire loop over end of upper spring and press down lever. Mailing weight 5 ozs.

- Price each ..... \$ .30

## NEWHOUSE SETTING CLAMP

Sets any Victor, Newhouse or Hawley and Nason Trap. An absolute necessity to the trapper, especially for setting the larger traps. Be sure to carry one in your kit.

- No. 4—Size of opening, 2 1/2 ins. For all traps up to and including No. 4. Mailing weight each 8 ozs.  
 Price each ..... \$ .45
- No. 5—Size of opening, 4 1/2 ins. For all traps larger than No. 4. Mailing weight each 1 lb.  
 Price each ..... \$1.00

## MARBLE'S SAFETY POCKET AXES

No. 3 Guarded

No. 6 Guarded

Marble's Safety Pocket Axes are extremely handy to have on the trap line for clearing away shrubs, etc., to enable the trapper to make a good set. The head is solid steel and has a very keen cutting edge. The guard is indispensable, as it keeps the axe from cutting the clothes while in the pocket.

- No. 2—Has a 2 1/2 x 4-in. head with guard. The handle is nickel-plated and has a rubber grip. Mailing weight 2 lbs.  
Price each ..... \$2.75
- No. 3—Has a 2 1/2 x 4 1/2-in. head with guard, nickel-plated handle with rubber grip. Mailing weight 2 lbs.  
Price each ..... \$4.00
- No. 5—Has a solid steel head with guard, and an 11-in. hickory handle. Mailing weight 1 lb.  
Price each ..... \$2.50
- No. 6—Has 3 x 4 1/2-in. solid steel head with guard, and 12-in. hickory handle. Mailing weight 1 1/2 lbs.  
Price each ..... \$2.75

## SPORTSMAN'S BELT AXE

This is a very serviceable axe to the trapper. The head is of the finest quality steel, with a genuine hickory handle. About the same size as No. 6, with a 14-in. handle. Mailing weight 2 lbs.  
Price each ..... \$1.50

## LEATHER AXE SHEATHS

- No. 2—Genuine Russian Leather Sheath to fit "Sportsman's" Belt Axe.  
Price each ..... \$1.25  
By mail extra 10 cents.

## MARBLE'S WATERPROOF MATCH BOXES

There is nothing more disappointing than to be miles away from home, either on the trap line or elsewhere, and to suddenly want a match, only to find that all your matches have become wet from either the rain or snow, and will not strike. With one of these match boxes it is absolutely impossible for your matches to get wet, or even damp, no matter what the conditions are. Every trapper should have one.

Price each ..... \$ .75

Add 5c. extra for postage.

## MARBLE'S IDEAL HUNTING KNIVES

Marble's Knives are the acme of perfection, and the result of skilled workmanship. Any trapper or hunter should be more than paid to own one of these knives. It is especially adapted for skinning and skinning. The blade is made from razor steel, with leather handle and stag tip. Both sizes complete with sheath.

- No. 41—5-in. blade. Mailing weight 6 ozs. Price each ..... \$2.50  
6-in. blade. Mailing weight 8 ozs. Price each ..... 2.75

## MARBLE'S WOODCRAFT KNIVES

No. 42—Leather handle with a 4 1/2-in. blade, which tapers down to a very thin point. Mailing weight each 8 ozs.

Price, complete with sheath ..... \$2.50

## MARBLE'S SAFETY HUNTING KNIFE

Closed

Open

This Marble's Knife is a wonder and is guaranteed perfect. For skinning animals it cannot be beat. It can be closed and carried safely in the pocket. When open, it is as rigid as a gun-time knife and has a built near the blade to give a good grip. The blade is of the best imported razor steel. Springs are of solid silver and the side plates genuine silver.

- No. 53—Has 4 1/2-in. blade. Mailing weight 8 ozs.  
Price each ..... \$4.25
- No. 55—Has 5-in. blade. Mailing weight 8 ozs.  
Price each ..... \$4.75

## MARBLE'S HANDY COAT COMPASS

This neat and compact compass attaches to the outside of the coat, vest or belt very securely and cannot be lost. It is absolutely waterproof, and is guaranteed not to degenerate. It balances so accurately that one can keep his direction while walking. No person in the country should be without one of these.

- No. 132—Stationary dial.  
Price each, post-paid ..... \$2.50
- No. 133—Revolving dial.  
Price each, post-paid ..... \$2.75

When sending remittances, be sure to include sufficient to cover postage and insurance, or express, shipping on such goods as are marked "Post-paid." If there is an express agent at your end, we can send goods express collect if you wish.

# FLASHLIGHTS

Every trapper should have a flashlight of some description in his kit. There is nothing more useful for examining your catch at night, or for making new sets. These lights can be flashed on at will, or run by hand boring while the trapper is working on his set. We offer below only the best of flashlights which are all thoroughly tested and guaranteed to give perfect satisfaction.

ALL PRICES ON FLASHLIGHTS ARE COMPLETE WITH BATTERY AND BULB.

Shipping weight 2  $\frac{1}{2}$  lbs. per foot.

YOU'LL BE MIGHTY GLAD YOU DID

# **"Shubert"** Improved Smoker, Will Double Your Fur Catch

The "SHUBERT" Smoker will drive Skunk, Raccoon, Mink and other fur-bearing animals from their dens, into your traps. Better than driving the animals out of their dens, as digging destroys the den while the "SHUBERT" Smoker merely fills it with suffocating smoke which the animal cannot withstand. Your outfit is not complete without a "SHUBERT" Smoker. It will add many skins to your season's catch.

## **MORE FURS MEAN--"MORE MONEY"**

Double your catch with the "SHUBERT" Smoker. You can smoke out more animals in one day, than you can take in traps in a month. In extremely cold weather when the animals hibernate and trapping is difficult, the "SHUBERT" Smoker is especially valuable. It will make any animal leave its den in two or three minutes.

## **USE THE IMPROVED "SHUBERT" SMOKER**

It is very easy to operate. It will increase your fur catch.

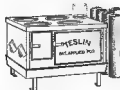

**Price complete, with one package of Smoke Powder, \$2.75**

Mailing weight 3 lbs.

### **ADDITIONAL SMOKE POWDER**

We carry a large quantity in stock, and will gladly furnish additional packages of Smoke Powder at 30 cents per package. Mailing weight per package 8 ozs.

## **TESLIN COLLAPSIBLE CAMP STOVES**

Ready for Use

These stoves are made of sheet steel and have almost as well as indirect draft. The covers on these stoves will bake as good as any range. When put together it makes a perfectly strong and rigid stove. They are the most stoves for camping, as they can be folded up into a small bundle, and moved from place to place. We thoroughly recommend these stoves to all trappers, hunters or trappers.

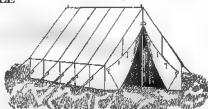

No. 2--As illustrated, 2 holes with oven. Shipping weight 30 lbs. Price each \$13.00

No. 4--As illustrated, 4 holes with oven. Shipping weight 40 lbs. Price each \$13.00

Set of 5 pipes suited for "Teslin" Stoves. Extra \$1.75

Shipping weight 5 lbs.

## **TENTS**

Tents are valuable to trappers, hunters and campers, through out the year. We are in a position to furnish all your requirements, and guarantee satisfaction. The following lines are of durable material, strong construction, and will satisfy the most exacting buyer. Note the exceptionally low quotations.

### **WALL TENTS**

8 x 10	7	20.00	24.50	28.00

All tents sent express collect. If there is no express agent at your end, we will give shipping weights on application.

# SHOT GUNS

No trapper's equipment is complete without a good shot gun. Often, traps are not sufficient in themselves to fully subdue some of the larger fur bearers, and the value of a reliable shot gun on such occasions, cannot be over-estimated. No trapper or farmer, should be without a rifle or shot gun of some description. The guns and rifles listed in this catalog are all popular models with established reputations and need no introduction to users of firearms. All rifles and shot guns thoroughly inspected and fully guaranteed.

No guns, rifles or ammunition sold to minors under 16 years of age. When ordering, sign name in space provided on back of order blank.

## Single Barrel Breech-loading Guns

HARRINGTON AND RICHARDSON

## HAMILTON RIFLES

THE BOY'S FAVORITE

No. 27—Chambered to take 22 short or long R.F. cartridge, length over all 30 inches, length of barrel 18 inches, bronze barrel with bolt top steel jacket, solid breech block action, blue-black gun finish, fitted with frog knife and open rear adjustable sights, automatic ejector. Price each \$4 50

Shipping weight 5 lbs.

## BROWNING REPEATING RIFLES

Hammerless, Solid Breech, Take Down, Translucent Action

The Browning Repeating Rifle incorporates all the latest improvements in rifles of this class. It was either 22 short, 22 long or 22 L.R. ammunition. The operation is by a transverse action. Magazine holds 15 short, 12 long or 12 long rifle cartridge at one time, either in round type or separately. The rifle is hammerless, the body in one piece encloses all movable parts with only one opening on the right side for loading and ejecting shells. Trigger safety catch and pump action stop are mounted on the trigger guard, a tube across from this, holding the trigger spring. The safety catch is located behind the trigger, magazine is located under the barrel, the movable witness handle is around the magazine and is constructed to prevent slipping when operating the pump. Model 1923—22 caliber, 21½-inch round barrel. Price each \$25 00

Shipping weight 5 lbs.

## PAGE-LEWIS RIFLES

This is a medium priced rifle, but includes material and workmanship equivalent to any of the high-priced rifles. They are guaranteed to give perfect satisfaction and we are sure they will satisfy.

No. D Model—22 L.R. caliber, rim fire, single shot rifle, round special steel barrel 20 inches, bolt action, steel stock and forward, oil finish length over all 37½ inches. Price each \$7 90

Shipping weight 6 lbs.

Bolt Action, Single Shot, 22 L. R. Calibre

## MARBLE'S GAME GETTER GUNS

Folded

Combination Shot Gun and Rifle

The great need for an all-purpose gun is filled by the Game Getter. It supplies the need for either rifle or shot gun, as it is equipped with two barrels, one above the other. The upper barrel 22 caliber, rifled for 22 short, 22 long and 22 L.R. cartridges, the lower barrel is smooth bore for 44 caliber and 410 gauge shot or round ball cartridges. The action or hammer is instantly adjustable to either barrel as desired. The hammer rebounds to safety catch after firing, the action is strong yet simple and partially visible from both barrels at the same time. Trigger guard must be pushed back to open breech. The folding stock is made from cold rolled sheet steel, anodized, it is locked when in position by a very strong sliding lock which ensures a steady hold in each drop at base of grip. Single trigger, drop forged blood frame, without grip plates, spools, front and rear sights.

Marble's Game Getter—Combination 22 and 44 caliber, and 410 gauge 12 M.M. 12-inch round blood barrels, complete with leather holster. Price each \$25 00

Shipping weight 6 lbs.

## DAISY AIR RIFLES

Teach the boys to shoot. These rifles are all tested before leaving the factory, and are guaranteed to be in perfect working order. For a cheap rifle, especially for target practice, they cannot be beat. Every boy wants one.

## LITTLE DAISY, SINGLE SHOT

No. 443—0, 12, 16 and 20 gauge, shot gun also otherwise same as above. Price each \$ .75  
Mailing weight each 6 ozs.

## MARBLE'S JOINTED RIFLE RODS

This rod will not wobble, bend or break at the joints. It has two steel joints and a twist, and is fitted with handsome cocobolo handle. Has angled and slotted detachable tips.  
No. 5022—For 22 and 25 calibre. Price each \$1.50  
No. 5722—For 25 and 30 calibre. Price each \$1.00  
Mailing weight each 1 lb.

# MARBLE'S RIFLE CLEANERS

THE SPRING TEMPERED SPIRAL STEEL COIL OF MARBLE'S CLEANERS

This cleaner can be attached to any standard rod. Each of its sections or brushes is composed of six washers of the softest brass grade that can be made, and all are a trifle less in diameter than the bore for which they are designed. By this arrangement the spring of its specially-made steel washers, grooved but one side of each brush against the bore.

Calibers: 22, 25, 32, 37, 38, 40, 44 and 45-50

Price each

Shipping weight 8 ozs.

## RIFLE CLEANING BRUSHES

No. 248—Bottle brush, twisted wire, brass shank 22 to 50 calibers. Price each \$ .25

No. 249—Bottle brush, twisted wire, brass shank 22 to 50 calibers. Price each \$ .25

The same eye in the same place. It is designed, when carrying the aim.

SHEARD'S FRONT SIGHTS for any Rifle, Price, Postpaid, \$2.00

# "SHUBERT SURE-CATCH" MEANS MORE FURS

No animal can resist its lasting and alluring odor

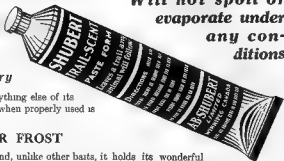

## THE NEW "Shubert Sure-Catch" PASTE BAIT

Economical to Use — Handy to Carry

"SHUBERT" now offers YOU, a Paste Bait superior to anything else of its kind on the market. It is put up under a patented process, and when properly used is guaranteed to give results.

NOT AFFECTED BY SNOW, RAIN OR FROST

Will not spoil or evaporate under any conditions

"Shubert Sure-Catch" Paste Bait cannot be affected by wind, snow, rain or frost, and, unlike other baits, it holds its wonderful attracting odor for three to four days at a time, thus making it unnecessary to rebait your sets every day. Some animals will not go near a set until twenty-four hours or more after it has been made, during which time the ordinary bait would have completely evaporated, but with "Shubert Sure-Catch" Paste Bait and Shubert Trail Scent, your set is just as effective after twenty-four hours, or even two or three days after it has been made. The less you disturb your traps, the greater are your chances of making a catch.

"Shubert Sure-Catch" Paste Bait and Shubert Trail Scent are put up in handy metal tubes, which are very easy to carry, without danger of spilling or breaking. It is very economical to use, each tube containing almost enough for a hundred sets. It is therefore an investment that pays for itself many times over.

*The alluring odor of "Shubert Sure-Catch" Paste Bait, is so exceedingly attractive, that no animal can resist it.*

"SHUBERT SURE-CATCH" No. 3 PASTE BAIT. Put up in metal tubes, for all flesh-eating animals

"SHUBERT SURE-CATCH" No. 4 PASTE BAIT. In metal tubes, for all water animals, such as Muskrat, Beaver, etc.

SHUBERT TRAIL SCENT, PASTE FORM. Put up in metal tubes, for making trails that any animal will follow

## "Shubert Sure-Catch" (LIQUID BAIT)

For the benefit of those who still prefer to use "Shubert Sure-Catch" in the liquid form, we are carrying a large quantity of this bait on hand. Thousands of sets were used by Canadian trappers last season with great success, which resulted in "more money" in his pocket. If you prefer liquid bait, you cannot get anything better than "Shubert Sure-Catch."

"SHUBERT SURE-CATCH" No. 1 For all flesh-eating animals  
"SHUBERT SURE-CATCH" No. 2—For all water animals—Muskrat, Beaver, etc.  
SHUBERT TRAIL SCENT, Liquid form—For destroying the human scent

PRICE PER CAN  
80c Post Paid

**KILODOR**  
A preparation specially made for killing the human odor on your traps and sets. When properly used it destroys every trace of human scent on your traps, which all animals would otherwise detect and avoid. KILODOR will greatly improve your set, and one tube will suffice for more than a hundred sets. TRY A TUBE.

KILODOR is made in paste form and comes in handy metal tubes, ready for use. Price per tube postpaid \$1.00

## SKUNK-SKOOTER

This is the only successful preparation on the market today, which is absolutely guaranteed to remove the smell of Skunk, Civet-cat, or any other obnoxious smell from the hands or clothing. No need to be afraid to trap Skunk now, when Skunk-Skooter will remove the smell entirely.

SKUNK-SKOOTER is also put up in paste form, in the usual handy metal tube, ready for use. Price per tube, postpaid \$1.00

## QUICK-LITE LAMPS

WITH DECORATED PANEL STYLE SHADE

The Quick-Lite is a Match-Lighting Lamp. It gives a 300 candle-power light of a wonderfully soft and eye-quiet quality. It releases and burns the pure gas from common gasoline cruet less than half a cent per hour to operate. Fits so with to burn, so chimney to work. Will not spill fuel or explode even if upset. Cannot be filled while lighted.

The Quick-Lite Lamp will last a lifetime with ordinary use. It is safely built of brass heavily nickel-plated and carefully tested by actual lighting before packing.

No. 60000 Quick-Lite, holds 3 quarts and burns 75 hours on one filling. One is perfect companion with shade, mantle, pump, wick, cleaning pick and extra gaskets. Price each \$10.50 Mailing weight 1/2 lb.

Mailing weight 3 lbs.

### BAIT RODS, AGATE GUIDE AND TIP

No. 88 1/2—Three joints and butt, cork grip, reel seat above handle, two-ring standing guides with agate guide on first joint and agate tip. 7 1/4 foot long. Price each \$4.75

Mailing weight 3 lbs.

### SPECIAL CASTING RODS, AGATE GUIDE AND TIP

No. 88 3/4—Three joints and butt, cork grip, reel seat above handle, extra large agate first guide, nickel silver large casting guide, extra large agate tip, casting finger hook on reel band. 6 foot long. Price each \$5.50

Mailing weight 3 lbs.

### FLY CASTING RODS

No. 89 1/4—Three joints and butt, cork grip, reel seat below handle, nickel silver casting guide and weaving fly tip. 9 1/2 and 10 ft. lengths. Price each \$3.75

Mailing weight 3 lbs.

When sending remittance, include sufficient to cover postage or express. If there is an express agent at your post, we will send goods Express Collect if you wish.

### REELS

Single Action, Raised Pillar, Polished Nickel, with Click.

No. 32—40 yards. 2 in. spool.	Price each	\$ 68
No. 33—60 yards. 2 1/4 in. spool.	Price each	60
No. 34—80 yards. 2 1/2 in. spool.	Price each	50

Mailing weight each 8 oz.

Balanced Pillar, Double Multiplying, Adjustable Back Sliding Click and Drag, Balanced Crank, White Hubberette Handle, Polished Nickel.

No. 102—40 yards. 2 inch spool.	Price each	\$3.80
No. 103—60 yards. 2 1/4 inch spool.	Price each	3.75
No. 104—80 yards. 2 1/2 inch spool.	Price each	3.60
No. 105—100 yards. 2 3/4 inch spool.	Price each	3.50

Mailing weight 12 ounces

Quadruple, Polished Nickel, Fancy Oil Cups on Back and Front Plates, Adjustable Sliding Click and Drag, White Stick Ivory Handle.

No. 1150—40 yards. 2 inch spool.	Price each	\$2.75
No. 1151—60 yards. 2 1/4 inch spool.	Price each	3.00
No. 1152—80 yards. 2 1/2 inch spool.	Price each	3.40

Mailing weight 12 ounces

When ordering goods be sure to send sufficient remittance to cover cost of Postage or Express, unless goods are marked Postpaid. If there is an Express Agent at your end, we will send goods Express Collect if you wish.

# Instructions for Ordering Supplies

Read carefully the description of the article required. Every article in this catalog is accurately described and most articles illustrated. In ordering, WRITE PLAINLY name of article, catalog number, quantity required and price. Be sure to mention size and kind of traps, caliber of gun, rifle or revolver, etc. Mark your order clearly and distinctly so that there can be no delay in filling same. Your name and address in full must be clearly and distinctly written. In order to facilitate delivery we suggest that you print your name and address on the order blank, thereby avoiding

any possibility of mistake in name or address. If your express office or shipping point is not the same as your post office be sure that you mark plainly in the space provided for this purpose the name of the agent to which the articles are to be shipped in case they are going forward by Express. Our order blank is very plain and if you order correctly you not only insure prompt delivery to yourself of articles ordered, but will enable "SHUBERT" to avoid mistakes in filling your order.

# How to Send Remittances

Always enclose sufficient money to cover fully the cost of the articles you want. Failure to do so will only mean delay. Prices of each article are plainly shown in catalog, also the mailing weight. Remit by Express Order, P. O. Money Order or Postal Notes. If you send cash be sure that letter is REGISTERED. Orders for goods to be shipped by mail must be accompanied with sufficient money or postage stamps to cover cost of transportation. We give below a scale showing the correct Parcel Post Rates from Winnipeg to various points throughout the Dominion. Please do not overlook including in your remittance a sufficient

amount to cover postage charges. All goods will be shipped by Parcel Post or Express. In cases where shipment is requested sent by Express, we will send same Collect, but if there should be no Agent at your Express Office it will be necessary for you to include sufficient remittance to cover Express charges; for in cases where there is no Agent at Express Office the Express Companies demand that parcels addressed to such points have all charges prepaid at this end.

**AMMUNITION CANNOT BE SENT BY MAIL.** All shipments of ammunition must go forward by Express.

# We Accept Raw Furs in Exchange for Supplies

"SHUBERT" will gladly accept raw fur shipments, the value of which may be applied towards the purchase price of any article you may require. When sending a shipment of raw furs with an order for supplies, be sure that you specify in the order blank that shipment is going forward to cover value of order for supplies. Always send the order blank direct to A. B. SHUBERT LIMITED, Winnipeg, Man., even though you send the shipment of furs to one of our branch offices. This will help to avoid delay, as it is not unusual for tags on parcels to be destroyed or lost,

so that by mailing your order blank direct to the Winnipeg office, it will insure certain delivery of your letter to us, and prompt attention to your order for supplies. Be sure, however, that the furs you send will cover fully the cost of any supplies you may order and the transportation on same. Don't hesitate, however, to send shipments the value of which may exceed the cost of supplies you order, for in all cases we will promptly send you remittance for the difference.

All prices are subject to change without notice.

## PARCEL POST RATES ON PARCELS MAILED FROM WINNIPEG, MANITOBA

Amount to	1 lb.	2 lb.	3 lb.	4 lb.	5 lb.	6 lb.	7 lb.	8 lb.	9 lb.	10 lb.	11 lb.
Any post office within 20 miles including place of mailing	05	06	07	08	10	12	14	16	18	20	22

Any post office in Ontario or Saskatchewan	10	12	14	16	18	20	22	24	26	28	30
Any post office in Quebec or Alberta	12	14	16	18	20	22	24	26	28	30	32
Any post office in the Maritime Provinces or British Columbia	12	14	16	18	20	22	24	26	28	30	32
Any post office in Yukon	12	14	16	18	20	22	24	26	28	30	32

The maximum charge on any parcel shall not exceed 7 cents an ounce.

## HAVE YOUR MAIL PARCELS INSURED

Don't for the sake of a few cents, take the risk of having your parcels lost. For your convenience and protection, we have made arrangements whereby you can have your mail parcels insured against loss by fire, theft, or from any cause whatever while the parcel is in transit. The cost of this protection to YOU, is but a trifle, and we recommend that you have all your mail parcels insured. The fees for the above-mentioned insurance are as follows:

Insurance for parcels valued up to \$25.00	\$ .05
Insurance for parcels valued from \$25.00 to \$50.00	10

## THE ART OF TRAPPING

**T**RAPPING is not only interesting and enjoyable but a sure and profitable way of making a very good livelihood can be made in the winter time by trapping the fur-bearers. It is not necessary to travel into the northern regions to do any trapping. Almost any farming section, especially those where there are streams, ponds or woods, make ideal and profitable trapping grounds. More furs are caught in the settled districts than in the wilder regions, with the exceptions of Fisher, Wolverine, Blue Fox, White Fox, etc. but so few of these are caught in comparison with the other animals, that it is much more profitable for the trapper to devote his time to the ordinary fur-bearers.

Trapping is no longer a difficult work. Of course like any other line of endeavor, it requires patience and attention. It is always helpful for the trapper to study the habits and modes of living of each animal, paying close attention to everything they do. This will be a great help to him, in knowing exactly where and when to make his sets. Conditions vary in different districts, and the trapper

must use his own judgment, until he becomes better acquainted with the particular district he may be trapping in.

When on a trap line, a trapper should remember that every animal is endowed with a keen sense of smell and with this in mind he should take every precaution, using plenty of **Shubert Trail Scent**, in order to avoid leaving any human odor along the trap line.

Traps should always be set with great care, taking steps to conceal the trap as well as possible, and yet having it directly in the animal's path. Gloves should be worn when setting traps, and to keep any human scent on the traps. If traps are set along the edge of a stream, the trapper should wear rubber boots and set the traps while wading down the stream. No human trail is left when the trapper walks through water.

By following carefully the directions given in the following pages, and by the proper use of "**Shubert Sure-Catch**" and **Shubert Trail Scent**, every trapper is sure to meet with good success.

## Skinning and Handling Fur-bearers

Catching the animal is not all there is to the art of trapping. It is just as important to have a thorough knowledge of skinning and handling the fur as many dollars are lost each year to trappers through poorly handled furs.

There are two ways to skin an animal. "**Cased**" and "**open**". To skin an animal cased the skin should be cut crosswise just under the tail, large enough to pull the tail through. The tail should be skinned and the tail bone removed, and then the skin should be drawn downward from the body. In order to make the process easier the animal should be suspended from the limb of a tree or some other projection, by tying a strong cord to the hind legs after they have been skinned, as shown in the accompanying illustration.

Coyote, Lynx-cat, Marten, Fisher, Weasel, Otter, Lynx and the entire Fox family, should be "**cased**" fur out and Bushy, Muskrat, Mink, Weasel, Skunk, House Cat and Fisher should be "**opened**". Bushy and fur a Muskrat and Coyote heads are worthless, as they will be cut off.

To skin an animal "**open**," the skin should be cut down the belly from the neck to the tail, and the skin peeled off, using a knife only when necessary. **Beaver**, **Badger**, **Badger**, **Timber Wolf**, **Mountain Lion** and **Beaver**, should be skinned "**open**."

After the skin is removed it should be scraped clean, carefully stretched and dried. Be careful not

to overstretch your furs, as this lessens the value. While on the boards the skins should be dried in the open air, and under no conditions should they be exposed to the heat of a fire, nor the rays of the sun. As soon as the skins are dry they should be removed from the boards.

## How to Ship

After skins are dried and removed from boards they should be packed in a bundle, one skin by another and tied together. Then slip off the stub of the tag, marked "**Inside Tag**," mark the contents of the shipment on this stub, as well as your name and address, and enclose it inside of your shipment. After shipment is well wrapped, the portion of the tag marked "**Outside Tag**" should be tied to the outside of the shipment, and on this should be marked your name and address and the contents of the shipment.

All shipments should be securely wrapped. These goods are expensive and should be packed in a sack and sewed up tight. If you do not own a good bag needle, let us know and we will send you one **Free of Charge**. Shipments of Skunk must always be shipped in tight fitting boxes.

If you will follow these instructions closely it will prevent errors and avoid delays in receiving your returns.

When you run out of Shipping Tags let us know and we will immediately send you another supply.

## Muskrat

This little animal is without doubt the most profitable of all to the trapper for although the value of a single skin is small in comparison to that of other animals it is not so difficult to trap; consequently, millions of dollars are paid to trappers each year for the enormous catch. The Muskrat is found almost any place in North America. It has a stout body, and is about four times the size of a common house rat. The legs are short, hind feet kind of webby, tail long and naked, being sort of rudder shaped. The tail is always removed before shipping the skins.

The Muskrat is a nocturnal animal, but is often seen in the day time, especially when building its winter house. It lives mostly in marshy, sluggy places, and among slowly moving streams and ponds. The houses are dome shaped and are built on the bottoms of ponds or on flat, grassy stretches, half covered with water. The houses are made of grass, mud, twigs, roots, etc., which are piled in a heap

until the top reaches a foot or two above the surface. A room is then excavated in the elevated part, from which there are two or three tunnels leading down into the deep water which never freezes.

Muskies that live along streams and creeks usually burrow into the bank underneath the surface of the water, and keep on excavating until they get two or three feet above the water level where they excavate a large room for their living quarters. These burrows are sometimes 40 to 50 feet in length, the entrances always being in deep water so that there will be no danger of freezing.

A good method to trap the Muskrat is to locate one of these entrances in the bank beneath the water, and place the trap near the entrance of the tunnel, taking care to conceal the trap as much as possible. If none of these entrances can be observed, a good method is to place a log in the water, with one end securely moored to the shore. Three or four traps can then be placed on this log, slightly covered with grass or moss, and if a little "Shubert Sore-Catch" is used here and there on the log, your set will be complete. Another method is to set a trap at the edge of a creek, in about four or five inches of water, and put a little "Shubert Sore-Catch" on a twig which can be stuck into the bank about six inches above the water. Always take care to fasten the trap in such a manner as to drown the Muskrat when caught, either by using a sliding pole, or by fastening the stake in deep water.

Muskies should be skinned "caped" and shipped flesh side out.

## Mink

The Mink is found most any place in North America. It has a long, slender body, about twice as large as a Weasel, with a small head, short ears and bushy tail. The fur varies from light brown to a very dark brown, nearly black, with a white spot on the chin.

The Mink spends the greatest part of its time in the water, and is, therefore, never found very far away from water. It can swim and dive well, and can remain a considerable time under water. It travels or moves about both day and night, being practically indifferent as to the time. It is a flesh eating animal, living mostly on fish, frogs, lizards, birds, mice and rabbits.

Mink can be trapped both on land as well as in water. To make a good water set, find a steep bank and dig a hole a foot about seven or eight inches above the level of the water. The hole should be about three or four inches in diameter and should extend out the bank about two inches. Put a fish frog, or if these cannot be obtained take a small piece of dried stick and cover this with "Shubert Sore-Catch" placing it in the back of the hole. Then set your trap in the water at the foot of the hole, and cover with mud and wet leaves.

If possible find a Mink trail along a stream, and by putting sticks into the ground, this trail can be diverted into the water. Make the passage of sticks just large enough to allow the Mink to pass through. Set the trap in this passage just under the water, and conceal it as well as possible. It is sometimes beneficial to set a trap in a hollow log, should one be found lying in the water. The use of "Shubert

Sore-Catch" with these sets will greatly increase the chances of making a catch.

When making a water set, it is advisable to use the "sliding pole" method, in order to drown the animal when caught. If this cannot be done, then put the stake in deep water, the entire length of the chain from the trap.

At mid-day in the early spring, when the sun feels warm, the Mink comes out of the water to lie in the sun's rays. The sun not only destroys the color of the fur, but turns the extreme point of the guard hairs, giving the fur the appearance of being stained, and also making the underfur woolly. These skins are called "stained" Mink, and usually have to be figured at a No. 3 or No. 2 price, depending on how badly stained the fur is.

Mink should be skinned "caped" and shipped flesh side out.

## Beaver

The Beaver, which is found all over Canada and the Northern States, is a thick, heavy bodied animal, having a flat naked tail, shaped like a paddle, and hind feet slightly webbed. The color of the fur varies from a light to a very dark brown. There is an extremely heavy growth of under fur protected by long guard hairs.

One of the Beavers' well known habits is to gnaw down trees, which they carry away for the purpose of damming up creeks or streams, thereby forming a pond, around which they build their houses.

The Beaver is rather a cunning animal, and it requires much patience and perseverance to trap

him. One method is to find a high standing bank and dig a pocket therein, a few inches deep. Put some "Shubert Sure-Catch" on a piece of green wood and hide this in the back of the hole. Then set and conceal a trap just beneath this hole in the water. If possible, use rubber boots and make this set while standing in the water, this avoids leaving any human scent.

A good winter set is to locate a place near the Beavers' house where the water would be about a foot deep, and make a hole in the ice about twenty inches square. Next make a pen by shoving a dead or dried sticks about two inches apart, get a piece of green wood, a branch of poplar preferred, and fasten this to a couple of the sticks in the pen, about three inches from the bottom. The trap should then be set underneath this on the bottom of the pond. Putting a little "Shubert Sure-Catch" on the branch will make the set more effective. Then cover the hole with evergreen boughs to keep it from freezing over. Never use a green stake in the trap, as the Beaver will chew this off and entry is away. Use Shubert Trail Scent when making sets for Beaver, as this will simulate the change of any human scent being left in the vicinity of the traps.

The spring season is the best for trapping Beaver as the pelts is then at its best.

Beaver should be skinned "open" and stretched as round as possible.

## White Weasel

This animal is found all over Canada, Newfoundland, and the Northern States. It has a long slender body, with short legs and small feet. The fur is pure white in the winter, with the exception of a black tip on the tail. In the summer the fur turns brown, and is thus of very little value. In the early spring when the fur begins to change color, gray and brown hairs will appear on the back. Such skins are known as "Graybacks" and greatly reduce the value of the skin. It is the White Weasel that is always in demand.

At times Weasels are caught that have yellow stains on their backs and are commonly known as "Stained" Weasel. As there is no way of removing this stain, the skins are not worth quite as much as the pure white ones.

Weasels are great wanderers and will travel many miles in a night. They are well known as "hen house pirates," and will often kill a great number of chickens in one night. They live in hollow stumps, crevices wherever they can find them, and sometimes in the burrows of other animals.

To make a good set, make an enclosure of sticks beside a Weasel trail, and in the back of this pen put some kind of bait, preferably a rabbit's head, which can be used many times over, and put some "Shubert Sure-Catch" on it. Conceal the trap well at the entrance to the pen.

If a Weasel visits your hen house, set a trap where

he entered, as he is sure to come back. Traps can also be set at entrances to burrows or in front of crevices, provided there are signs of Weasels thereabouts, always taking pains to conceal the trap as much as possible. Always use plenty of "Shubert Sure-Catch" with these sets, to improve results.

When trapping Weasels, always fasten a heavy clog to the end of the chain, as you are often apt to catch a larger animal in the trap, and if a heavy enough clog is used, you will be doubly sure of your catch.

White Weasel should always be skinned "cased" and shipped back side out.

## Coyote

The Coyote is of a dull, yellowish grey color, sometimes sprinkled with a few white and black hairs. Tail is full and tipped with black. It is found all over Canada, and the greater part of the United States.

Coyotes are small Wolves, and generally roam around the prairie country. They are very cowardly, and at the same time very cunning, consequently hard to trap. They are very destructive to cattle and sheep, but very seldom make an attack unless in packs of five or six. They live in burrows which they dig, or sometimes in enlarged Badger dens. Many of the provinces in Canada pay a bounty for the capture of this animal, but sometimes the pelt is damaged and greatly reduced in value through

the procedure used when the bounty is paid, especially in cases where the head or ears are cut off.

A good way to trap Coyotes is to lead a trail and set two traps on the trail about twenty-five yards apart. About the centre, between the two traps, put a small animal as a bait, but do not skin the animal. A piece of horse, sheep, or a hen, badger or rabbit will have a good effect. Put plenty of "Shubert Sure-Catch" on the bait. The traps and chains should be well covered, and be free from human odor. Shubert Trail Scout should be used to eliminate all human odor from the trail, for if there is the least suspicious trace left, the Coyote will not attempt to look for the bait.

The traps should be fastened to heavy logs, so that the animal will not be able to drag it far. When visiting a set for Coyotes, never go up to the trap, if possible observing your set from a distance. Fresh "Shubert Sure-Catch" is not needed on the bait for three or four days.

Another method is to place an old carcass of a cow or horse in the field, and set traps around this in a circle, or if there is a small mound close by, put another trap on the top of this mound. However, traps must be free from human odor, and together with the chains, should be well concealed. "Shubert Sure-Catch" and Shubert Trail Scout, should always be freely used to ensure success.

Coyotes should be skinned "cased" and shipped for side cut.

## Lynx

The Lynx is found all over Canada, Alaska, and the Northern and North western States. In appearance it resembles a huge cat. It has a flat face, pointed ears, large legs, and large feet. Color is reddish brown, liberally mixed with long silver hair. Under part is grayish. Tail is barred and tipped with black.

The best place to look for Lynx, is in the bushy and wooded parts of the country. Lynx are good climbers and swim well, but are very slow on land. Their food is composed of rabbits, partridge and Marten. Marten are very scarce in a district where there are Lynx to be found. The Lynx is a very stupid animal and not difficult to trap.

A good Lynx set is to build a pen of stakes about three feet high, and place a rabbit or partridge, on which should be put a little "Shubert Sure-Catch" at the back of the pen. Then conceal a trap at the entrance to the pen so that the animal will have to pass over the trap, in order to gain an entrance to the pen. The chain should be attached to a heavy log. Cover the pen with branches, to keep the trap and bait from being snowed over.

Another good set is to make a long pen about three feet high, open at both ends. In the centre of this pen put a piece of bait or a stick, on which should be rubbed plenty of "Shubert Sure-Catch," and conceal a trap at each entrance to the pen.

If a Lynx trail can be found amongst dense shrubbery, conceal a trap in the trail slightly

covered with snow, and hang a partridge or rabbit, on which should be rubbed a little "Shubert Sure-Catch" directly over the trap. Shubert Trail Scout rubbed on the heels, will destroy any human odor which may otherwise have remained on the trail.

Lynx should be skinned "cased" and shipped for side cut.

## Skunk

Skunk will be found in most any part of Canada, especially in the Eastern provinces. It has a large stout body, short legs, small head, and a long bushy tail. The fur is black, with a white mark on the head which divides into two stripes running down the back and along the tail. In some specimens these stripes extend only half way down the back, while in others there is practically no stripe at all, just a white mark on the forehead and a white tip on the tail.

The Skunk is a nocturnal animal, but is often seen in the day-time. It is well known for its peculiar means of defense. When attacked or cornered, it ejects a foul smelling and vile liquid. As this animal is not cunning, and has very little fear of human beings, it is a very easy animal to trap.

One of the best methods for trapping Skunk is

to set a trap slightly concealed at the entrance to a den. A piece of chicken or rabbit, or some rotten eggs are good bait, and should be placed inside of the den, if "Shubert Sure-Catch" is used on this bait, it makes a perfect and attractive set. If you cannot find a den, dig a hole under the stump of an old tree, or under some rotten logs, place the bait inside the hole and set the trap at the entrance, slightly concealed. If Skunk are located under a barn, place traps at the different places where the Skunk may enter, narrowing down the entrance so the animal will have to pass over the trap, and also use some "Shubert Sure-Catch" on the logs or boards directly above or beside the trap.

Traps should be fastened either solid or to the centre of a long clog, so that the animal cannot drag the trap underneath a building.

When a Skunk is trapped, it can be killed if it is approached slowly and hit over the back with a long stick. This will break the animal's back and prevent it from emitting its scent.

Skunk are easy to trap and the pelts being good prices. No one needs to be afraid to trap and skin Skunk. "Skunk-Kicker" will absolutely remove all odor of Skunk from your hands or clothing. It is put up in metal tubes and can be carried anywhere in the pocket, so that no trapper need worry any longer about being "stunk up."

Skunk should be skinned "cased" and shipped flesh side out.

## Raccoon

Raccoon are found chiefly in British Columbia, Ontario, Quebec and the Maritime provinces, also in the United States. They are a stout, short animal, general color grizzly and brown, intermixed with white and black hairs, sometimes being very dark on the back, with a black spot on each cheek completely surrounding the eye. Tail is bushy, yellow, ringed with black.

The Raccoon is a flesh-eating animal, living on birds, frogs and fish, but will also eat vegetables, sometimes paying a visit to a nearby corn field. Raccoon are also very fond of fowl, and often visit a farmer's hen house, where they will destroy a number of fowl on one visit. They are chiefly a nocturnal animal, travelling mostly at night. Raccoon are excellent tree climbers and swim well. They are mostly found around marshy and boggy places.

One method of trapping Raccoon is to tie a bright piece of tin or stick to the pan of the trap, and place the trap in a few inches of water at the edge of a marsh where Raccoon are known to visit. Put some "Shubert Sure-Catch" on a twig and stick this in the mud just in front of the trap, so that the top of the twig will stick out of the water. Raccoon are very curious, and once attracted by the "Shubert Sure-Catch" they will notice the shining piece of tin on the pan of the trap, and will try to reach this with their paws.

If a log is found at the edge of a stream, or in a bush, and there are signs of Raccoon, cut a notch

in the log and place the trap in the notch. Put some "Shubert Sure-Catch" directly underneath the trap, then cover the trap up with moss, or rotten logs.

Another good method, is to locate a Raccoon trail, leading up to a corn field or chicken house, and build a pen of stakes in the trail. Put a piece of fish or chicken at the back of the pen on which should be put some "Shubert Sure-Catch," and set a trap at the entrance, well concealed. Attach the trap to a fairly heavy clog. It is advisable to use Shubert Trail Bait when running a trap line for Raccoon, as this will destroy all human odor on the trail, and the animal will not hesitate to travel over your own trail.

Raccoon should be skinned "open."

## Marten

Martens are about the same size as ordinary house Cat. They have short legs, small feet, small ears and a thick bushy tail. Color varies from light yellowish brown to a rich dark brown. Martens are found all over Canada and in the forest districts of the United States. They are expert tree climbers, making their homes mostly in holes, high up in some old tree. However, they sometimes live in hollows in the rocks or in burrows. Being good tree climbers they use on birds and their eggs. They also eat mice, rabbits and squirrels.

## Otter

Otter are found all over North America and New foundland. They have a long, heavy body, very short legs, webbed feet, and a long tail which slowly tapers to a point. The tail at the base, is almost as thick as the body. Color varies from a light to a rich dark brown. Under fur, soft and thick.

The Otter are aquatic animals, and spend most of their time in and around water, especially large streams and lakes. They live practically on fish, but will sometimes eat frogs, or an occasional Muskrat. Otter are beautiful swimmers, and generally catch their fish by swimming them down.

When making sets for Otter great care should be taken to leave no human odor whatever on the traps, as the Otter is a very suspicious animal. Everything should be left as natural as possible after making a set. The trap should be fastened to a "siding pole," or to a heavy log.

A good set is to locate an Otter slide on some bank, and at the top of the slide, put some "Shubert Sure-Catch" on a piece of stick and place in the bottom of the cavity, then place the trap over this, covering it completely with leaves or dry moss. A trap may also be set at the bottom of the slide in a few inches of water.

If the banks of the stream are not steep enough for the Otter to have a slide, find the trail which they take when travelling from one stream to another. Dig a small hole in the trail and put the trap in, covering well with leaves or moss. When following an Otter trail, or when making sets for Otter, be sure to always wear gloves, and also have plenty of Shubert Trail Scout rubbed on

A good set is to build a pen against some old tree, so that the tree will form the back part of the pen. Get a squirrel or rabbit, putting plenty of "Shubert Sure-Catch" on it, and place in the bank of the pen, then set a trap at the entrance. The pen should be covered with branches or bark to keep the snow out.

A good tree set is to drive a couple of pegs or spikes into a tree trunk, and set the trap on these pegs. Get a piece of bait, put on some "Shubert Sure-Catch," and nail to the tree about a foot above the trap. Fasten the trap chain to the tree so that when the animal is caught and falls, it will not be able to touch the ground.

Another good set is to cut a notch in an old tree stump, put some "Shubert Sure-Catch" in the notch, and then place the trap over it, slightly covering with moss or old twigs.

Still another method is to cut down an old tree, making a V-shaped notch in the stump. Lay the trunk of the tree in the notch so that the end will project about fifteen inches. Wedge a piece of bait well covered with "Shubert Sure-Catch," into the end of the trunk, and cut a notch about twelve inches from the end, laying the trap in this notch between the trap chain to the tree.

Marten should be skinned "cased" and shipped fur side out.

the soles of your shoes. By doing this you will avoid leaving any human scent on the trail, which any Otter would detect and avoid.

Sometimes Otter are caught that have the antrons and of the guard hairs slightly curled. This is caused by the Otter coming out of the water and warming himself on a warm day, which causes the fur to be dried too quickly, and take on a wadded appearance. These skins are known as "singled," and this defect lowers the value.

Otter should be skinned "cased" and shipped fur side out. The tail should be slit open its entire length on the underside.

## Red Fox

The most commonly known of all Foxes is the Red Fox. Found all over North America and Newfoundland. Color varies from a pale red to a dark red, with sometimes a few dark hairs down the centre of the back. Tail is very bushy, same color as the body, with a white tip.

The Fox is well known as the shrewdest and most cunning of all animals, therefore, requiring patience and skill to trap. "Shubert Sure-Catch" and Shubert Trail Scout will greatly facilitate the trapping of Fox. The Red Fox lives on mice, woodchucks, fish, partridge, and have a very keen taste for poultry. This weakness will often lead them to rob a farmer's hen roost.

The Fox possesses an unusual, cunning, and has a very acute sense of smell. Sets should be made as natural as possible, otherwise suspicion will be

aroused, and the Fox will not venture near the set. Great care should be taken to leave no human odor whatever, on the traps, which should always be carefully concealed, as well as the chains.

To trap Red Fox: Set an old stump, and dig a hole underneath it. Put some "Shubert Sure-Catch" on a piece of bait, placing it in the back of the hole. Set a trap at the entrance, cover it with a piece of paper, and sprinkle dirt on the paper with the trap a hidden. Fasten the chain to a drag, and conceal both carefully. Another method is to locate a small keel or an old stump, and set a trap on top, concealing it carefully. Place the carcass of a skunk, woodchuck or chicken, smeared with "Shubert Sure-Catch," about six feet away from the trap. The Fox, being suspicious, will obtain the highest viewpoint to look at the bait.

A good winter set is to build a mound of snow close to a tree trunk. Lay a few good and hard, making a hollow in the top. Line this hollow with dry twigs and place the trap therein, carefully covering it with loose snow. Rub some "Shubert Sure-Catch" on several pieces of bait, and stick these into the side of the mound. Bait the chain and the drag, should be hidden under the snow. Another method is to rub plenty of Shubert Trail Scout on the soles of your shoes, locate a Fox trail and follow this for some distance, then set a couple of traps on this trail a short distance apart, concealing carefully with snow. Gloves must always be worn when making sets for Fox.

Red Fox should be skinned "canned" and shipped for side out.

## Cross Fox

The Cross Fox is merely a color variety of the Red Fox, and is found all over Canada and the Northern and North-western States. It is about the same size as a Red Fox. The color varies greatly, some specimens being dark red, intermixed with gray and black hairs, especially on the rump. There is a black band that runs across the shoulders, being crossed by one running down the back, forming a distinct cross, from which this particular variety of Fox derives its name. The tail is very bushy, the same color as the body, with a white tip.

The Cross Fox possesses the same characteristics and cunning of the Red Fox, and requires the same amount of patience and skill to trap. However,

the trapper is rewarded when he makes a catch, as the pelt of this Fox is worth much more than that of the Red Fox.

The same sets as those mentioned above for Red Fox, can be used for trapping the Cross Fox. However, it is well to remind the trapper that he must use the utmost caution when making his sets. He should put plenty of Shubert Trail Scout on his shoes before going out, and should see that there is "Shubert Sure-Catch" rubbed on all bait he may use. Traps, chains and drags should always be well concealed.

Cross Fox should be skinned "canned" and shipped for side out.

## Silver Fox

This variety of Fox is the scarcest of all the Fox family. It is one of the most valuable fur bearers on the North American continent. It is of the same size as the other Foxes. The color is black, mixed with a few silver-gray hairs, especially along the rump. Those that have but few or no silver-gray hairs are called Black Fox, being almost as valuable as the Silver Fox. The tail is also bushy and bushy, with a white tip. Silver and Black Fox are found all over Canada, Newfoundland, Alaska and the extreme Northern States.

On account of its great value as a fur-bearer, this species of Fox are now being raised on Fox Farms in many parts of Canada.

Their characteristics, foods and mode of living, are similar to those of the Red Fox. The same methods are used for trapping, also extreme caution and carefulness must be exercised when making the sets.

Silver Fox should be skinned "canned" and shipped for side out.

## Fisher

A very valuable fur bearer, found especially where the country is rugged and fairly well timbered. Fisher are somewhat larger than Marten, color being dark brown, slightly lighter toward the head. Tail long and bushy, also dark brown, sometimes almost black.

The Fisher is an expert tree climber, being as agile as the squirrel, and is also a fast traveller on the ground. Principal food consists of rabbit, squirrel, partridge, etc.

## Wolverine

The Wolverine is known as the worst enemy the trapper has to contend with. He will follow up the trap line, stealing the catch out of every trap, eating what he can and hiding the rest. If a Wolverine discovers your trap line, either give up the trap line or capture the Wolverine. The Wolverine has a heavy, bear-like body, short legs and short bushy tail. Color is dusky brown, becoming grizzly on head and neck. Wolverine are found in Canada, Alaska and the extreme Northern States.

## Badger

Badger are found all over Western Canada and the Western United States. They have a heavy-set, flat body, short legs and short feet. Color is yellowish gray, with a sprinkling of black hairs. There is a white stripe on the forehead, running up from the nose, also a black spot in front of each ear.

This animal is an expert digger, and lives in burrows which it digs. The principal foods of the

A good Fisher net, is to build a pen of sticks about two feet high, put a piece of bait in the back of the pen, secured with "Shubert Sure-Catch," and conceal a trap at the entrance. Attach the chain to a clog. Hollow logs or any other natural exclosures, make good places to set a trap.

Fisher should be skinned "cased" and shipped fur side out.

To make a set for Wolverine, hang a piece of bait on a tree, and set traps around the tree, carefully concealed in the snow. Another way, is to place a rabbit in a trap, on which should be rubbed a little "Shubert Sure-Catch," and place traps around this in a circle. Fasten the trap to a good, heavy clog. Traps, chains and clogs, should all be well concealed.

Wolverine should be skinned "cased" and shipped fur side out.

Badger are gophers, prairie dogs, mice, etc. They also like fresh meat.

The best set for Badger, is to dig a small hollow at the entrance of a burrow and place the trap therein, covering slightly. Put some "Shubert Sure-Catch" on a small twig, and stick this in the ground a few inches away from the trap, to the side.

Badger should be skinned "open."

## Black Bear

Black Bears are found all over Canada and the United States. They are dark black, with nose and lower half of face brown. They live on berries, mice, frogs, insects, and are known to be very fond of honey.

A good method for trapping Bear, is to build a pen of poles about three feet high and large enough to accommodate a Bear. Put a chunk of fresh meat, well smeared with "Shubert Sure-Catch" at the back of the pen, and conceal a trap at the entrance. It is well to lay a stick across the

entrance about six inches above the trap, so that in stepping over, the Bear will put his feet in the trap. Traps should be fastened to an extremely heavy clog, preferably a log about eight or ten feet long. Conceal the chain and clog as well as possible.

The Brown Bear is merely a color variety of the Black Bear, and is trapped in the same manner.

Bear should be skinned "open" and the head, feet and claws left on.

## Timber Wolf

The Timber Wolf is larger than the Coyote. Color, gray, mixed with black hairs. It is found in the timbered parts of Canada, and the North-western States. It possesses all the cunning and wariness of the Coyote, but is by no means a coward; on the other hand it is a ferocious animal, and will often attack man.

Many of the provinces of Canada pay a bounty

for the capture of this animal, but sometimes the procedure used in collecting the bounty, often ruins the skin.

The same methods, and baits used in trapping the Coyote, can be applied to the Timber Wolf with equal success.

Timber Wolf should be skinned "open" and the head, feet and claws left on.

## Lynx Cat

In general appearance the Lynx Cat resembles the Lynx. However, it is smaller in size and has longer legs. It is an expert tree climber, and makes its dens in hollow trees, or in caverns among the rocks. Its food consists of rabbits, squirrels, partridge, etc.

To trap the Lynx Cat, build a pen of sticks, place a rabbit smeared lightly with "Shubert Sure-

Catch" at the back of the pen, and set a trap at the entrance, well concealed. If one of the animals' dens can be found, set a trap at the entrance to the den. Traps should be fastened to a heavy clog, both of which should be well concealed.

Lynx Cat should be skinned "cased" and shipped fur side out.

# BIG PRIZE CONTEST

## **\$200.<sup>00</sup>**

**In Cash**

## **WILL BE GIVEN AWAY**

for the best photographs of fur collections, or animals in traps, resulting from catches made when "SHUBERT SURE-CATCH" has been used. Read carefully the rules of the contest.

**You may be the ONE to get  
the Big Prize. TRY FOR IT!**

### **LIST OF PRIZES**

First Prize	-	-	-	-	\$50.00
Second Prize	-	-	-	-	30.00
Third Prize	-	-	-	-	20.00
Fourth Prize	-	-	-	-	15.00
Fifth Prize	-	-	-	-	10.00
Next 15 Prizes	-	-	-	-	each 5.00

### **Rules of Contest**

The contest is open to any trapper who purchases and uses "SHUBERT SURE-CATCH" animal baits. All you have to do, is to send in a photograph of your catch, or of the animals in traps (which have been caught as a result of using "SHUBERT SURE-CATCH"), accompanied with a letter giving your opinion of "SHUBERT SURE-CATCH" as an animal bait and attractor, and describing your results in using "SHUBERT SURE-CATCH."

There is no limit to the number of photographs each contestant may enter. Each entry will stand an equal chance of winning one or more prizes.

Names and address should be plainly written on the back of photographs, as well as on letters. Also state in your letter whether the skins shown in your photographs were shipped to "SHUBERT."

**Get Your Photographs in Quick  
Send in as many as you can  
Contest Closes May 31st, 1924**
